

## Installing the Software Bundle on Microsoft Windows

To install the software, you must have administrator privileges on your system. The installer places the Java Runtime Environment (JRE) software in %Program Files%\Java\jre7, regardless of the specified JDK install location.

**Note:** This installer does not displace the system version of the Java platform that is supplied by the Windows operating system.

### Before You Install

1. Verify that your system meets or exceeds the minimum hardware requirements:
  - . 800MHz Intel Pentium III or equivalent
  - . 512 MB of RAM.
  - . 750 MB of free space

**Note:** The installer uses the %USERPROFILE%\Local Settings\Temp directory to store temporary files.

  - .
2. Verify that you have administrator privileges on your system.
3. Download the installer file and save it on your system.
  - . For the 32-bit Windows operating system, the installer file name is jdk-7u80-nb-8\_0\_2-windows-i586.exe.
  - . For the 64-bit Windows operating system, the installer file name is jdk-7u80-nb-8\_0\_2-windows-x64.exe.
